

# An Inspiring Workshop on Ceramic Glazing at Dakshinachitra

## **Students and faculty along with the trainer**

A workshop on ceramic glazing was organised by the department of KAUSHAL Kendra, Loyola College for the first year UG and first year PG students of 3D Animation on 02 March 2020. They were trained on the continuation process of figure modelling using ceramic at Dakshinachitra.

Mr. Potrarasan, the trainer, provided an in-depth brief on different types of glazing methods used and the procedures to be done after the glazing. Once the procedures were taught, the students were given freedom to use their creativity on glazing the models of their choice.

Students had the great opportunity to witness an exhibition of 8 masterpieces. Out of it four were of Korean style and four of Indian style. A visit to the cartoon exhibition, which gave a lot of inspiration to students, was a beautiful culmination for the day of enjoyable learning.
