

Magalir Mattum

Eminent Film Director Mr. Brama was invited for a discussion on his recent movie *Magalir Mattum*, for the students of Film Making, Film Editing and Cinematography on 4th October 2017. On the previous day, the students along with the faculty members had seen the movie in Sathyam cinemas.

He shared his experiences during the interaction about *Magalir Mattum*. He also requested the students to share their view about his previous movie *Kuttram Kadithal*.

Followed by the students sharing, he said that the *Kuttram Kadithal* script was new to the Tamil cinema and that concept replicated the real scenario in society at that time. The script was shortly finished after getting approval from the producer. Then the film was produced and released quickly. A very happy moment came when *Kuttram Kadithal* won the International Film festival award.

Further he said that the *Magalir Mattum* movie was a feministic theme and the script was initiated based on his mother's life style with the technology intervention through the social media.

Then he added that the casting plays a major role with team effort for the movie's success. Lot of layers were added in the movie to explicate feminism and their independency.

Finally he concluded by saying that, "Media is a tool and you have a responsibility to do a lot of things in society. You have to listen and observe whatever you are seeing in your day-to-day life in and around you, learn and understand the culture and mind-set. From that you have to point out which affected your mind, and then make a movie. Make it a habit to read newspaper and magazines to understand and update yourself about the culture change in society apart from literature."
