

## LCR meter

The HIOKI 3532-50 LCR HiTESTER is an impedance meter which uses a touch panel as the user interface. This interactive touch panel enables extremely easy operation. The test frequency can be set from 42 Hz to 5 MHz at high resolution. The values of a maximum of any four of the fourteen test parameters, including not only impedance  $|Z|$  and phase angle  $\theta$ , but also L, C, and R etc., can be simultaneously displayed upon the screen. Moreover, this widely applicable impedance meter can be set, not only to a floating voltage setting, but also to a constant voltage setting or a constant current setting.

Instrument Details	
Model	HIOKI 3532-50 LCR HiTESTER
Frequency Range	50 Hz – 5 MHz
Display	Simultaneous display of L, C, R

### Applications:

- Dielectric measurement,
- Impedance analysis
