## LOYOLA COLLEGE (AUTONOMOUS), CHENNAI - 600034

## M.C.A.DEGREE EXAMINATION - COMPUTER APPLICATIONS

THIRD SEMESTER - NOVEMBER 2018
16/17PCA3ESO1- RESOURCE MANAGEMENT TECHNIQUES

Date: 31-10-2018
Dept. No. $\qquad$

1) When does the simplex method of solving an LPP give an unbounded solution?
2) Name the phases of operations research.
3) Mention the methods for finding the initial basic feasible solution of a transportation problem.
4) What is the objective of assignment problem?
5) When does the game have a saddle point?
6) List the classification of replacement problems.
7) What is network scheduling?
8) List the conditions that has to be satisfied for an activity to lie on the critical path.
9) What do you mean by balking and reneging?
10) Given $\varphi=0.6$, what is the probability that there are no customers in the system?

## PART - B

Answer ALL the questions
$5 \times 8=40$
11) a) Solve the following LPP graphically

Maximize $30 \mathrm{x}+40 \mathrm{y}$
Subject to $3 \mathrm{x}_{1}+2 \mathrm{x}_{2} \leq 60$
$3 \mathrm{x}_{1}+5 \mathrm{x}_{2} \leq 80$
$5 \mathrm{x}_{1}+6 \mathrm{x}_{2} \leq 110$
$\mathrm{x} 1 \geq 0, \mathrm{x} 2 \geq 0$
(OR)
b) Find the optimal solution for the following using simplex method:

$$
\begin{aligned}
& \text { Maximize } 30 \mathrm{x}+40 \mathrm{y} \\
& \text { Subject to } 2 \mathrm{x} 1+\mathrm{x} 2=300 \\
& 3 \mathrm{x} 1+4 \mathrm{x} 2=509 \\
& 4 \mathrm{x} 1+7 \mathrm{x} 2=812 \\
& \mathrm{x} 1 \geq 0, \mathrm{x} 2 \geq 0
\end{aligned}
$$

12) a) Solve the following transportation problem using UV method.

| D1 | D2 | D3 | Supply |
| :--- | :--- | :--- | :--- |
| 300 | 360 | 425 | 600 |
| 390 | 340 | 310 | 300 |
| 255 | 295 | 275 | 1000 |

Demand 400
500
800
(OR)
b) Solve the following assignment problem

## $\begin{array}{llll}\mathbf{P 1} & \text { P2 } & \text { P3 } & \text { P4 }\end{array}$

| $\mathbf{J 1}$ | 2 | 10 | 9 | 7 |
| :--- | :--- | :--- | :--- | :--- |
| $\mathbf{J 2}$ | 15 | 4 | 14 | 8 |
| $\mathbf{J 3}$ | 13 | 14 | 16 | 11 |
| $\mathbf{J 4}$ | 4 | 15 | 13 | 9 |
|  |  |  |  |  |

13) a) Write the steps involved in Laplace and Hurwicz criterion (OR)
b) A machine costs ₹ 500 . Operation and maintenance costa are zero for the first year and increase by ₹ 100 every year. If money is worth $5 \%$ every year, determine the best age at which the machine should be replaced. The resale value of the machinery is negligibly small. What is the weighted average cost of owning and operating the machine?
14) a) Determine the shortest path of the following network:

b) construct a network diagram for the project specified below

| Event $\rightarrow$ Event | Activity | Predecessor <br> Activity |
| :---: | :---: | :---: |
| $1 \rightarrow 2$ | A | - |
| $1 \rightarrow 3$ | B | - |
| $1 \rightarrow 4$ | C | - |
| $2 \rightarrow 5$ | D | A |
| $3 \rightarrow 6$ | E | B |
| $4 \rightarrow 6$ | F | C |
| $5 \rightarrow 6$ | G | D |

15) a) Explain Queueing System and classification.
(OR)
b) A bank is considering to open a drive-in window for customer service. Management estimates that the customers will arrive for service at $15 /$ hour. The teller whom they consider to employ can serve customers at the rate of 1 in every 3 minutes. Assuming Poisson arrival and exponential service time.

Find
i) Utilization of teller ii) Average customers in the queue iii) probability of zero customers in the system. Iv) Idle time of the teller.

## PART - C

## Answer ANY TWO questions

$$
2 \times 20=40
$$

16) a) Solve the following LPP using Big M method (15)

Maximize

$$
12 \mathrm{x}_{1}+15 \mathrm{x}_{2}+9 \mathrm{x}_{3}
$$

Subject to:

$$
\begin{aligned}
& 8 x_{1}+16 x_{2}+12 x_{3} \leq 250 \\
& 4 x_{1}+8 x_{2}+10 x_{3} \geq 80 \\
& 7 x_{1}+9 x_{2}+8 x_{3}=105 \\
& x_{1}, x_{2}, x_{3} \geq 0
\end{aligned}
$$

b) Describe the Hungarian method of solving an Assignment problem
17) a) The marketing department of a food products company worked out their payoffs in terms of yearly net profit, for each of the strategies of 3 events. This is represented in the payoff matrix below. Select the strategy on the basis of the following:

| Strategies Nature of state | S1 | S2 | S3 |
| :---: | :---: | :---: | :---: |
| N1 | 70000 | 30000 | 15000 |
| N2 | 50000 | 45000 | 0 |
| N3 | 30000 | 30000 | 30000 |

b) Solve the game with the following payoff matrix using theory of dominance.

Player B
$\begin{array}{cc} & \left.\begin{array}{rrrr}I & I I & I I I & I V \\ \text { Player A } & 1 \\ & 2 \\ 3 & 2 & 3 & 6 \\ 3 & 4 & 7 & 5 \\ 6 & 3 & 5 & 4\end{array}\right]\end{array}$
18) a) The following information is known about a project. (10)

| Activity | Activity Time (days) | Immediate <br> Predecessor(s) |
| :---: | :---: | :---: |
| A | 7 | - |
| B | 2 | A |
| C | 4 | A |
| D | 4 | B, C |
| E | 4 | D |
| F | 3 | E |
| G | 5 | E |

i) Draw the project network.
ii) Identify the critical path and
ii) Determine the project duration.
b) At a central warehouse, vehicles are at the rate of 24 per hour and the arrival rate follows poisson distribution. The unloadingtime of the vehicles follows exponential distribution and the unloading rate is 18 vehicles per hour. There are 4 unloadingcrews.

Find(i) Po and P3(ii) Lq, Ls, Wq and Ws . (10)
